

Road work and signing

Objectives:

- Activate road safety automatons

Products:

- ARM-IOD
- ARM-REMOTE

Application:

On roads and motorways, it may be dangerous (if not impossible) to go and activate manually safety automatons when there's an obstacle.

Our package radio remote control ARM-REMOTE and modem ARM-IOS makes road personnel safer.

Configuration:

The ARM-REMOTE control does not necessitate any programming, it already integrates an ARM-IOD.

The ARM-IOD device has only one input/output channel.

A frontal LED flashes when the information has been correctly received.
