Monarch & Fixed Region modes

External RF switch regional antenna control

Network

Sigfox™

ATIM Nano NWW is a line of **ultra-low-power** Combo Radio Module providing Sigfox LPWAN technology and Bluetooth Low Energy (BLE) V4.2.

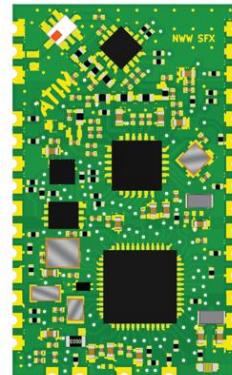

This module embeds ST Microelectronics components **S2-LP** (Sub-GHz RF) and **Blue-NRG 248** (BLE SoC). The complete version includes an accelerometer and a temperature sensor. A version with a secure element is also planned.

The module can be configured on a specific geographic zone or can be used in Monarch mode, detecting Sigfox beacons from base stations and managing the radio frequency changes according to the local regulation. The NWW has several smart functions to increase dramatically the battery's life: optimization of the Monarch scan duration, adaptative RF power, and Adaptative single frame.

The **Bluetooth** connection facilitates the configuration and firmware update which can be done with a smartphone or a PC.

It will also be possible to use the module as a concentrator, allowing the messages received from Bluetooth to be sent to Sigfox.

- Because it is difficult to realize a broadband antenna covering the 6 zones (RCZ1 to RCZ6), the module is configurable and can control an RF switch to automatically select the corresponding antenna of the usage region.

The footprint is the same for all modules of ATIM nano Nx line.

Technical features

Dimensions	30 x 18 x 2mm (SMD Mounting)
Temperature	-20°C à +70°C (operating mode) -40°C à +105°C (storage mode)
Frequency	Sub-GHz (862-928MHz)
Technology	Sigfox Monarch + BLE4.2 + GFSK M2M + Stand-Alone Mode
Monarch	Adaptative Scan
Output Power	0 – 22dBm (Adaptive Power Control)
Sensitivity	-131 dBm
Link Budget	156 dB
Power supply	2.5 – 3.6Vdc
Consumption (Vdd 3.3V)	
Tx	23 mA (14 dBm) 177 mA (22 dBm)
Rx	17.8 mA
Deep Sleep	1.25 µA
Low Power w/Accelero	3.8 µA
Low Power with Timers	1.6 µA
Interface	Low level UART
Optional Secure Element	H/W & S/W Authentication, data encryption
Certifications	CE EN300-220 RED
