Video support

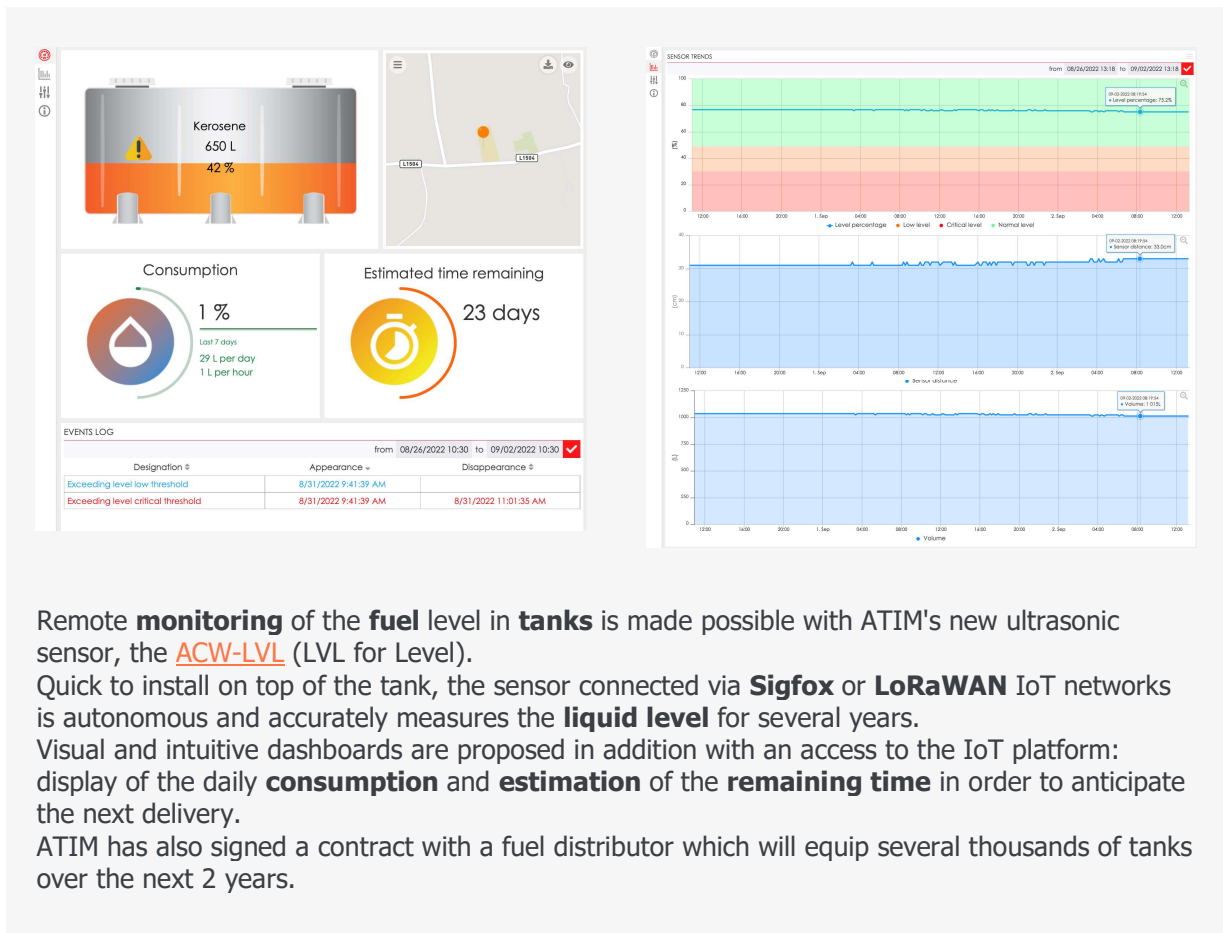

The video **#4** shows how to open an **ACW** case in "Pepper" format, the manipulation being very simple without any screw. These boxes are IP65 waterproof and can therefore be placed outdoors, in addition the electronic board is tropicalized.

The **video** is **available** on our ► [Youtube channel](#).

Tank level monitoring

Remote **monitoring** of the **fuel** level in **tanks** is made possible with ATIM's new ultrasonic sensor, the **ACW-LVL** (LVL for Level).

Quick to install on top of the tank, the sensor connected via **Sigfox** or **LoRaWAN** IoT networks is autonomous and accurately measures the **liquid level** for several years.

Visual and intuitive dashboards are proposed in addition with an access to the IoT platform: display of the daily **consumption** and **estimation** of the **remaining time** in order to anticipate the next delivery.

ATIM has also signed a contract with a fuel distributor which will equip several thousands of tanks over the next 2 years.

Lighting control for stadiums 💡

The **ATIM** [radio modules](#) are used to control [LED projectors](#) in [stadiums](#). The solution implemented by our partner **HORUS SYSTEMS** allows the modernization of large playing fields (soccer, rugby or other outdoor fields) without modifying the existing cables, without civil engineering and without adding dedicated cables.

This device allows a **multi-power** management of the lighting according to the trainings and the matches and by half field.

HORUS SYSTEMS, a **specialist** in lighting management **systems**, **manages** the entire **protocol** and network part. ATIM takes care of the radio communication between the different equipments. The radio performance of the ATIM "**nano**" modules allows to get rid of obstacles and to guarantee an optimal range.

Digital catalogue

For more **flexibility** and quicker updating, we have opted for the digital format of our catalog version.

Available on our **website**, you can also access it via the **QR** opposite.
On your smartphones 📱

Solutions IoT

Your **partner** in **wireless** data **transmission**
ATIM offers you all the links of the **IoT** chain.
