

ACW MangOH

SIERRA · IOT · FLEXIBLE · READY TO USE

THE ACW MangOH

is a product that has been designed to send data over long distances from a MangOH® board with a low power consumption and using a large variety of radio technologies :

Sigfox™

LoRaWAN®

Local Modbus

Flexibility: Several operating modes are available from 'AT' commands / settings via UART : transparent, secured, repeater, test, UART to Sigfox, radio (point to point) to Sigfox.

Range: A link budget up to 161 dBm. This allows you to have a range (Line-Of-Sight) more than 15km !

Adapters: ATIM provides a complete range of shields and evaluation boards: Raspberry PI® interface, Arduino®-interface, « The Airboard® » shield, « LoRaBee shield », USB Key and Mini PCI Express
